The Problem

“I am already paying for my accounting team and software.

I need investment reporting but do not want to spend additional money on a portfolio system like Addepar (plus a team to run it)

My data is scattered across multiple systems / portals (not everything is in the General Ledger)

It will need Lots of manual reconciliation and download work to put into the portfolio system

In addition to all the extra cost, I will also need to ensure that the Portfolio and Accounting systems match

The Solution

Collation Bots

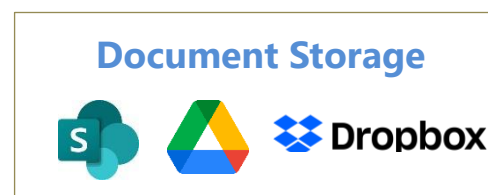

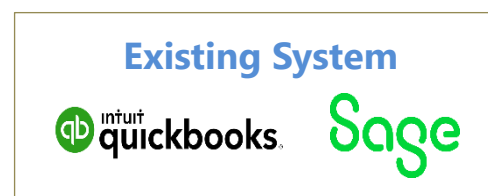

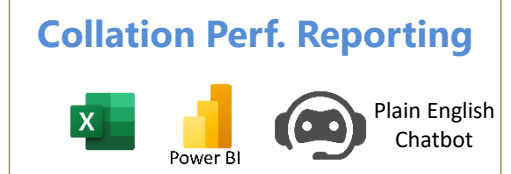

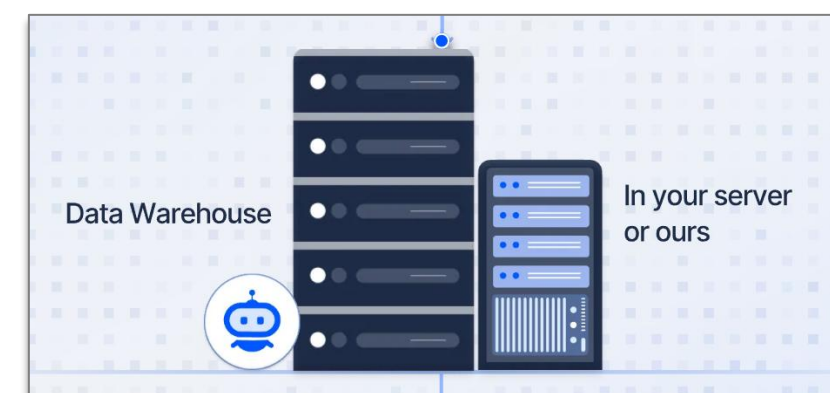

- Extract data from your existing General Ledger
- Enrich this data with bank/broker feeds, documents from portals, real estate websites etc.
- Centralize this data into your own Data Warehouse / Document Storage
- Run Data Audits, Reports, Automated Data Fixes and other Workflows on your data
- Meet all your investment reporting needs

Analytics and Recon Bot

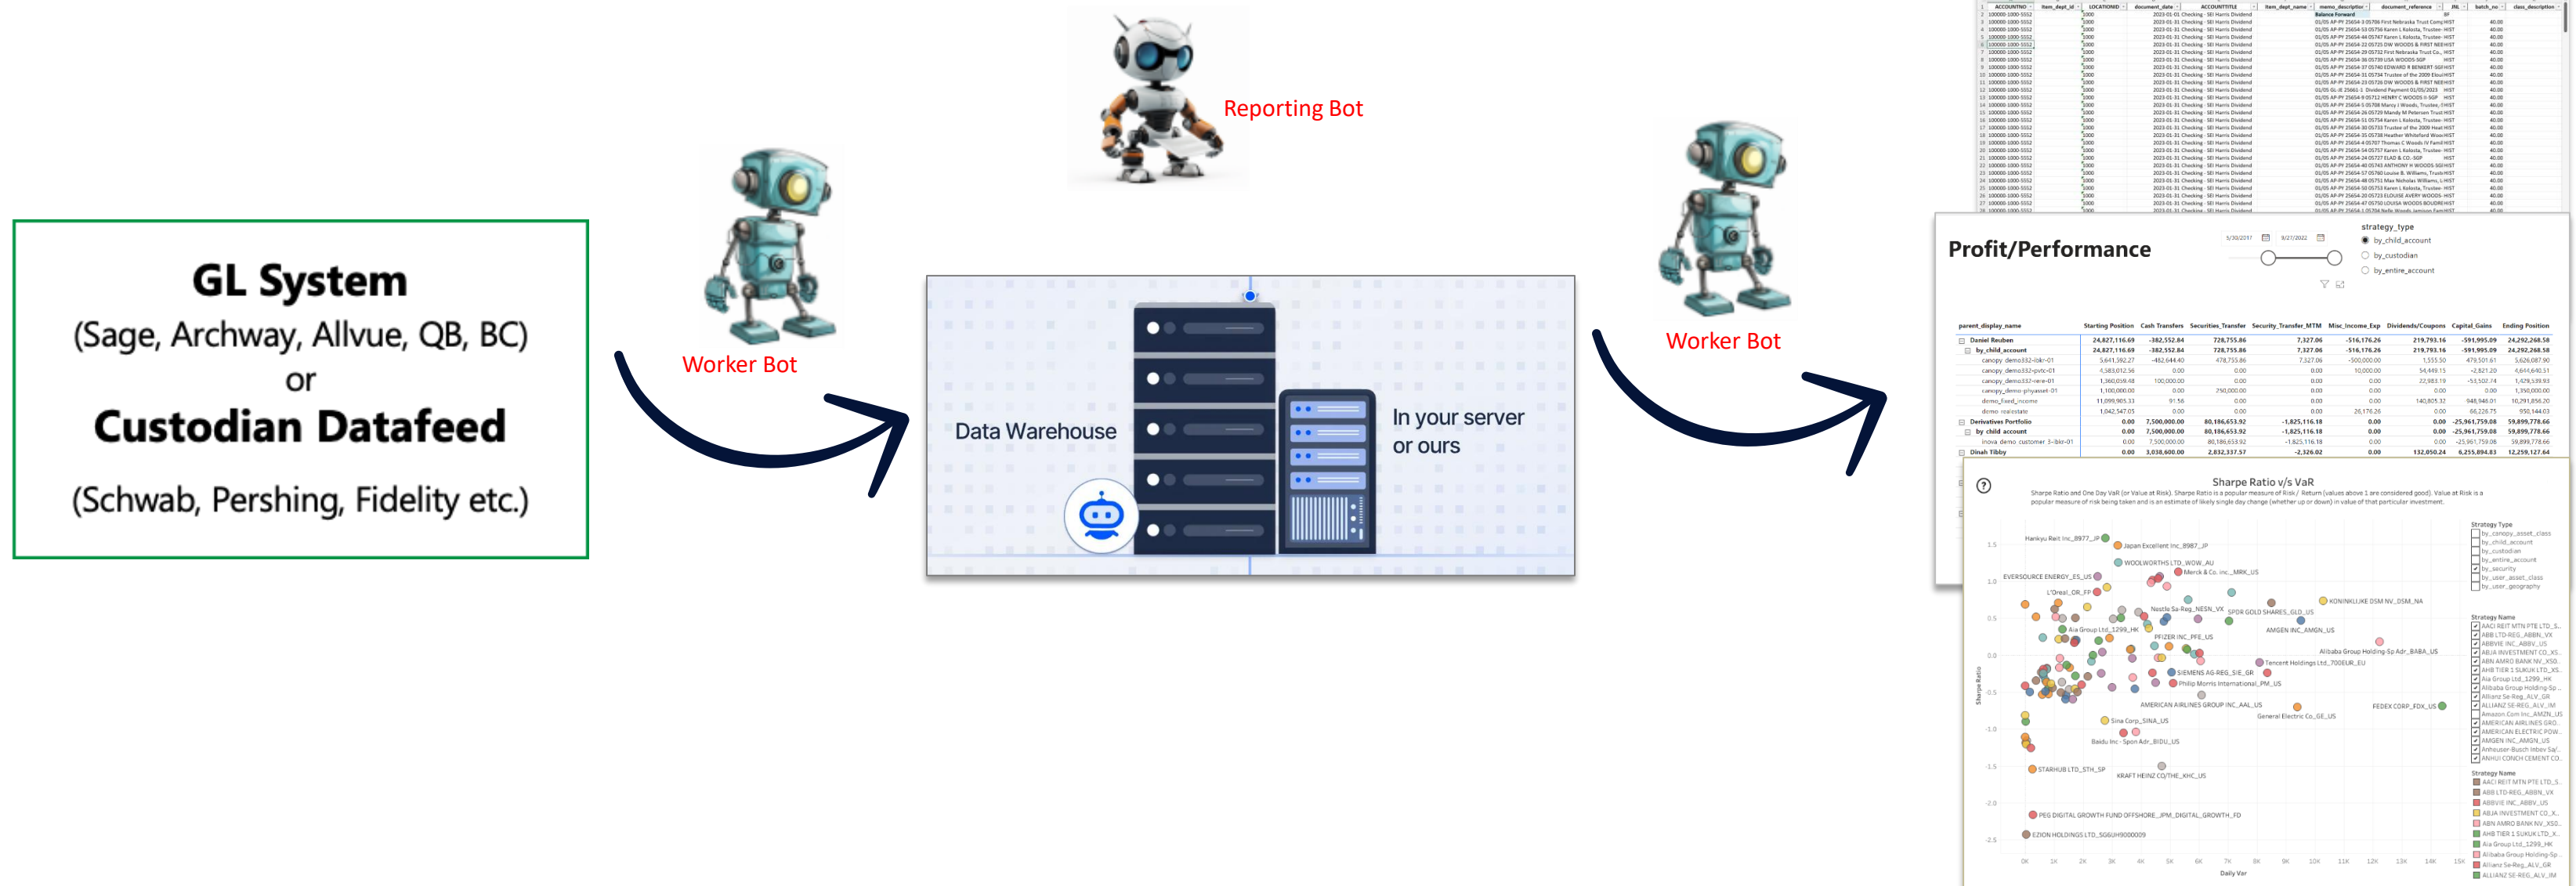

Worker Bot

Case Study 1

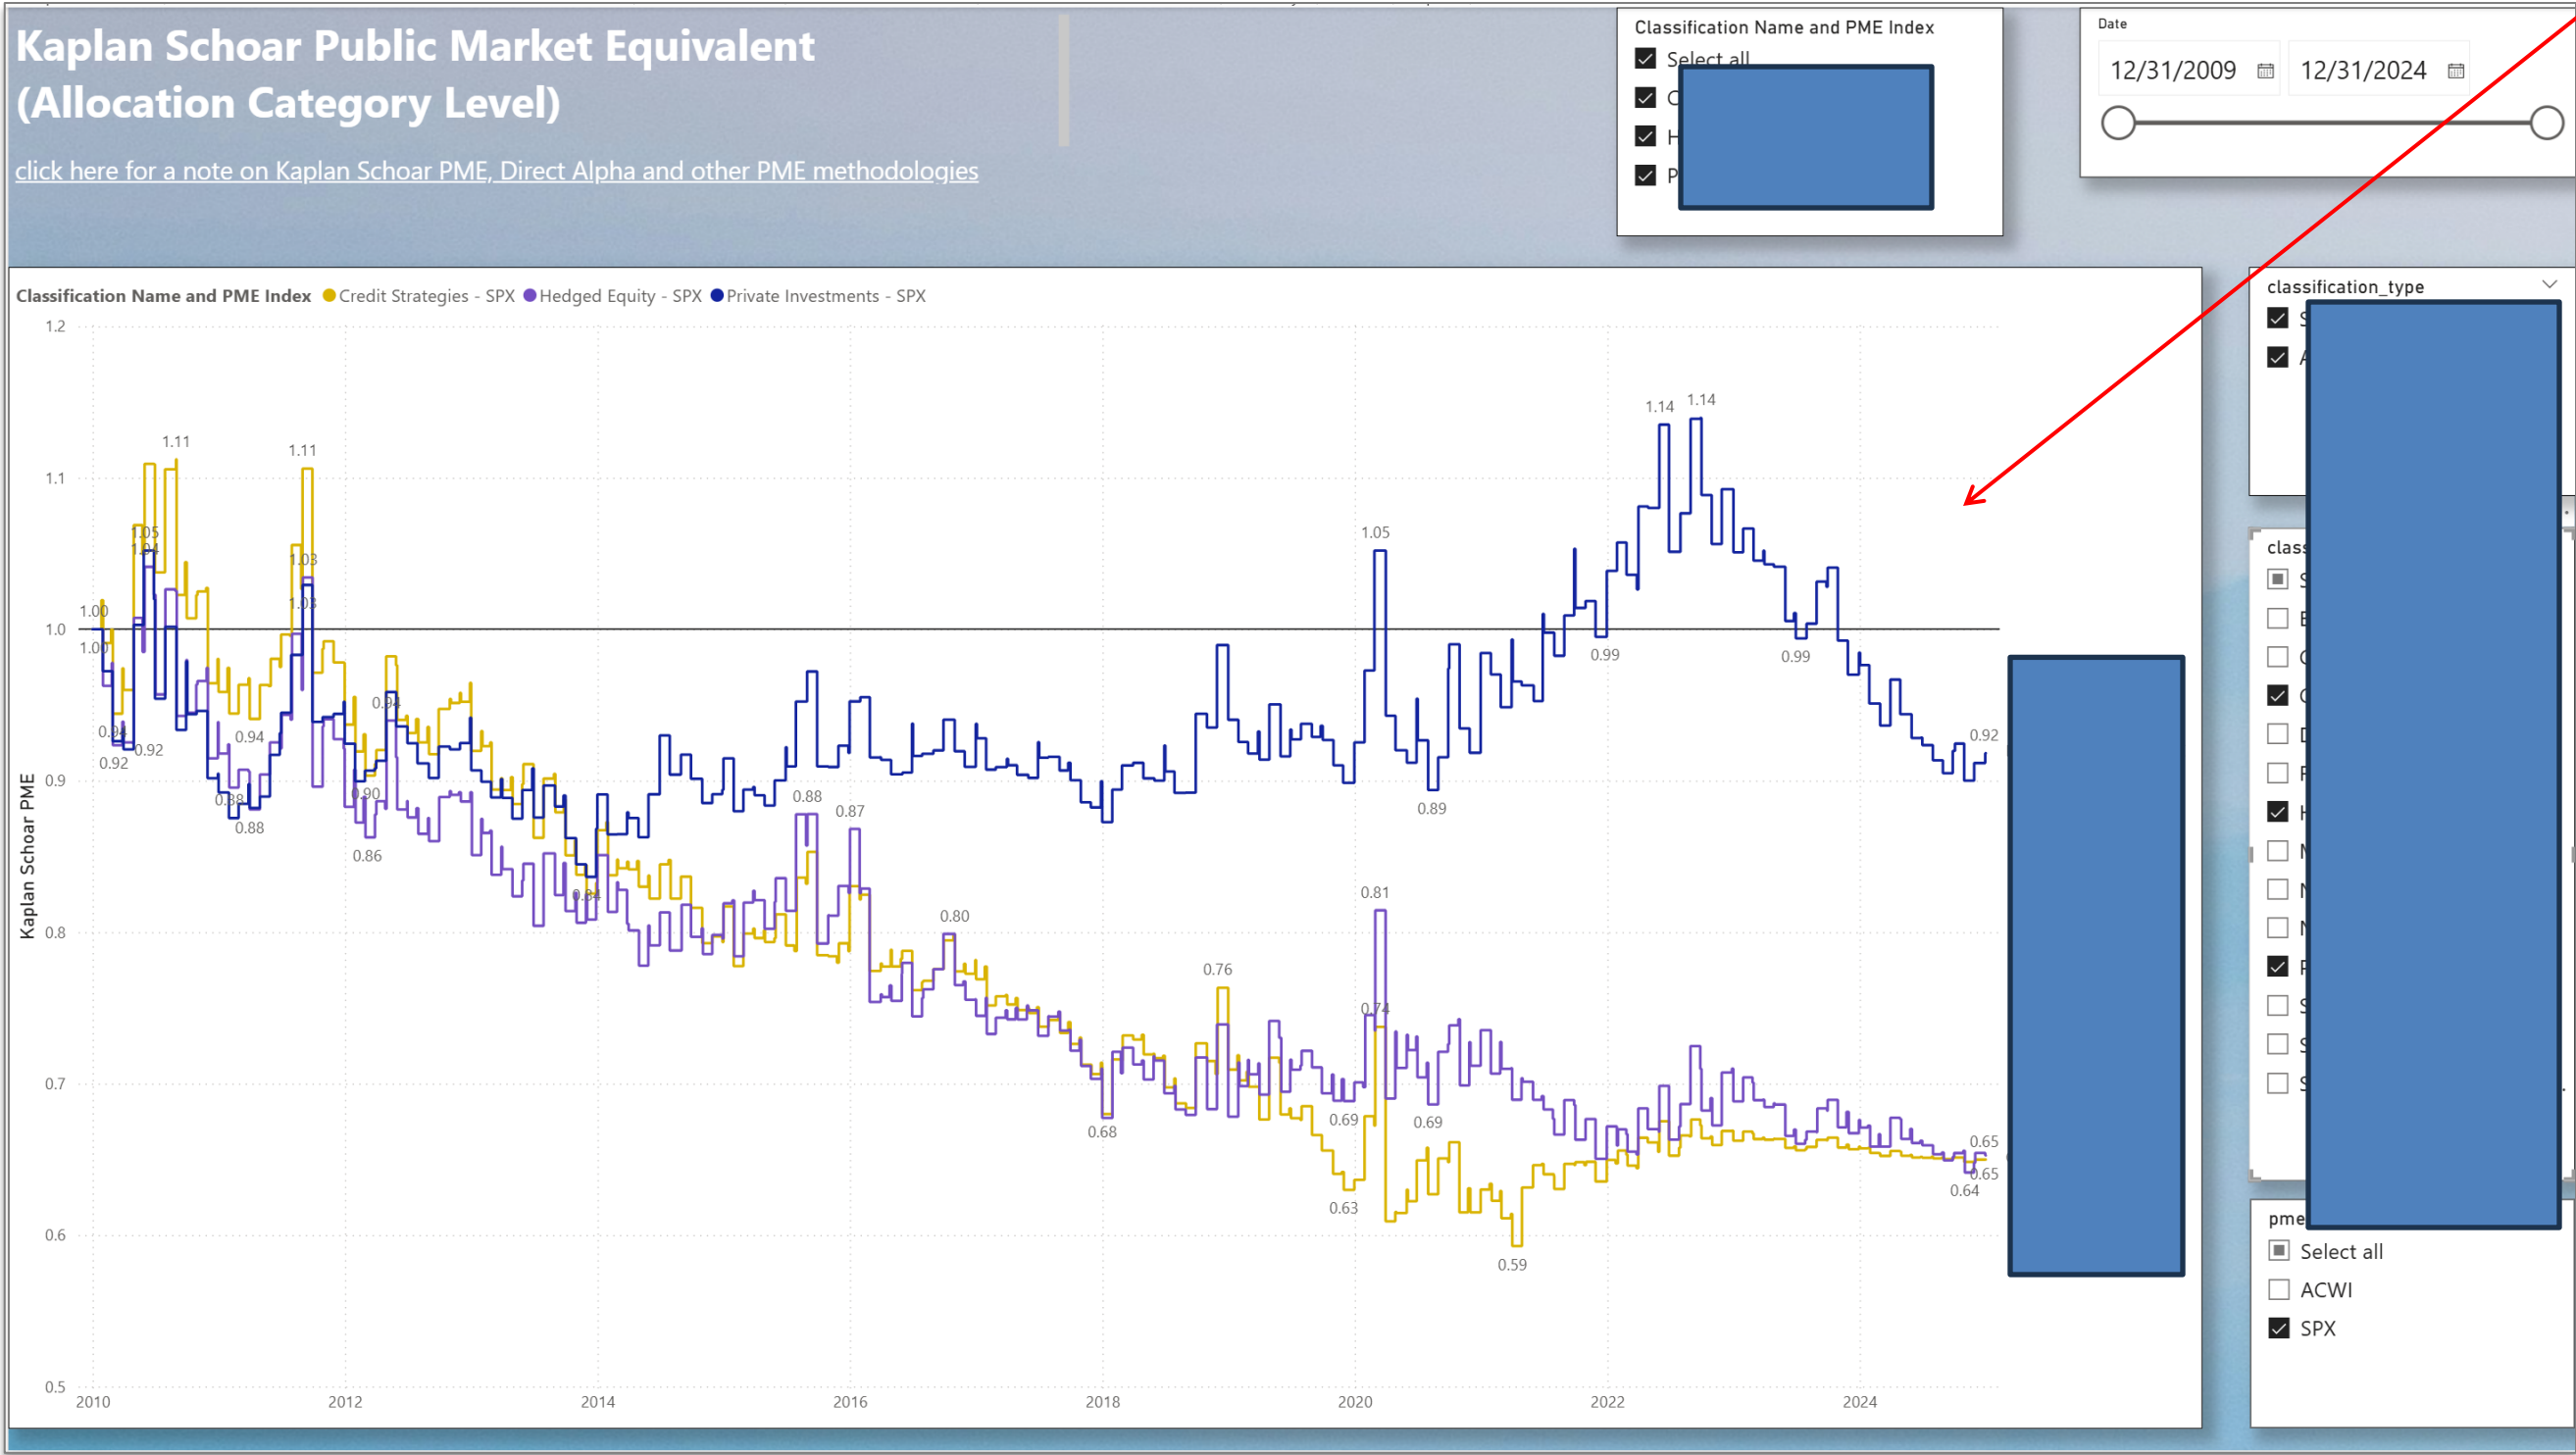

The Problem: I already pay for an Accounting System, don't want to pay additionally for a portfolio system like Addepar

The Solution: Collation.ai generates investment reports from my existing Accounting System

Case Study 1 Sample Output - Public Market Equivalent

Shows relative performance of private equity strategy to the public markets

Randomized Data for Illustration Purposes only

Case Study 1 Sample Output – Explainer

- Instantaneously calculate Profit/TWR for any date range
- Drill down from macro to individual securities

Explainer by Allocation Category

Please ignore TWR for Private Equity because TWR is not the correct metric for individual PE funds

Randomized Data for Illustration Purposes only

Case Study 1 Sample Output – Profit/TWR etc Charts by Strategy

Market Value of Strategy

TWR by strategy

Money Invested (inflow/outflow) into strategy

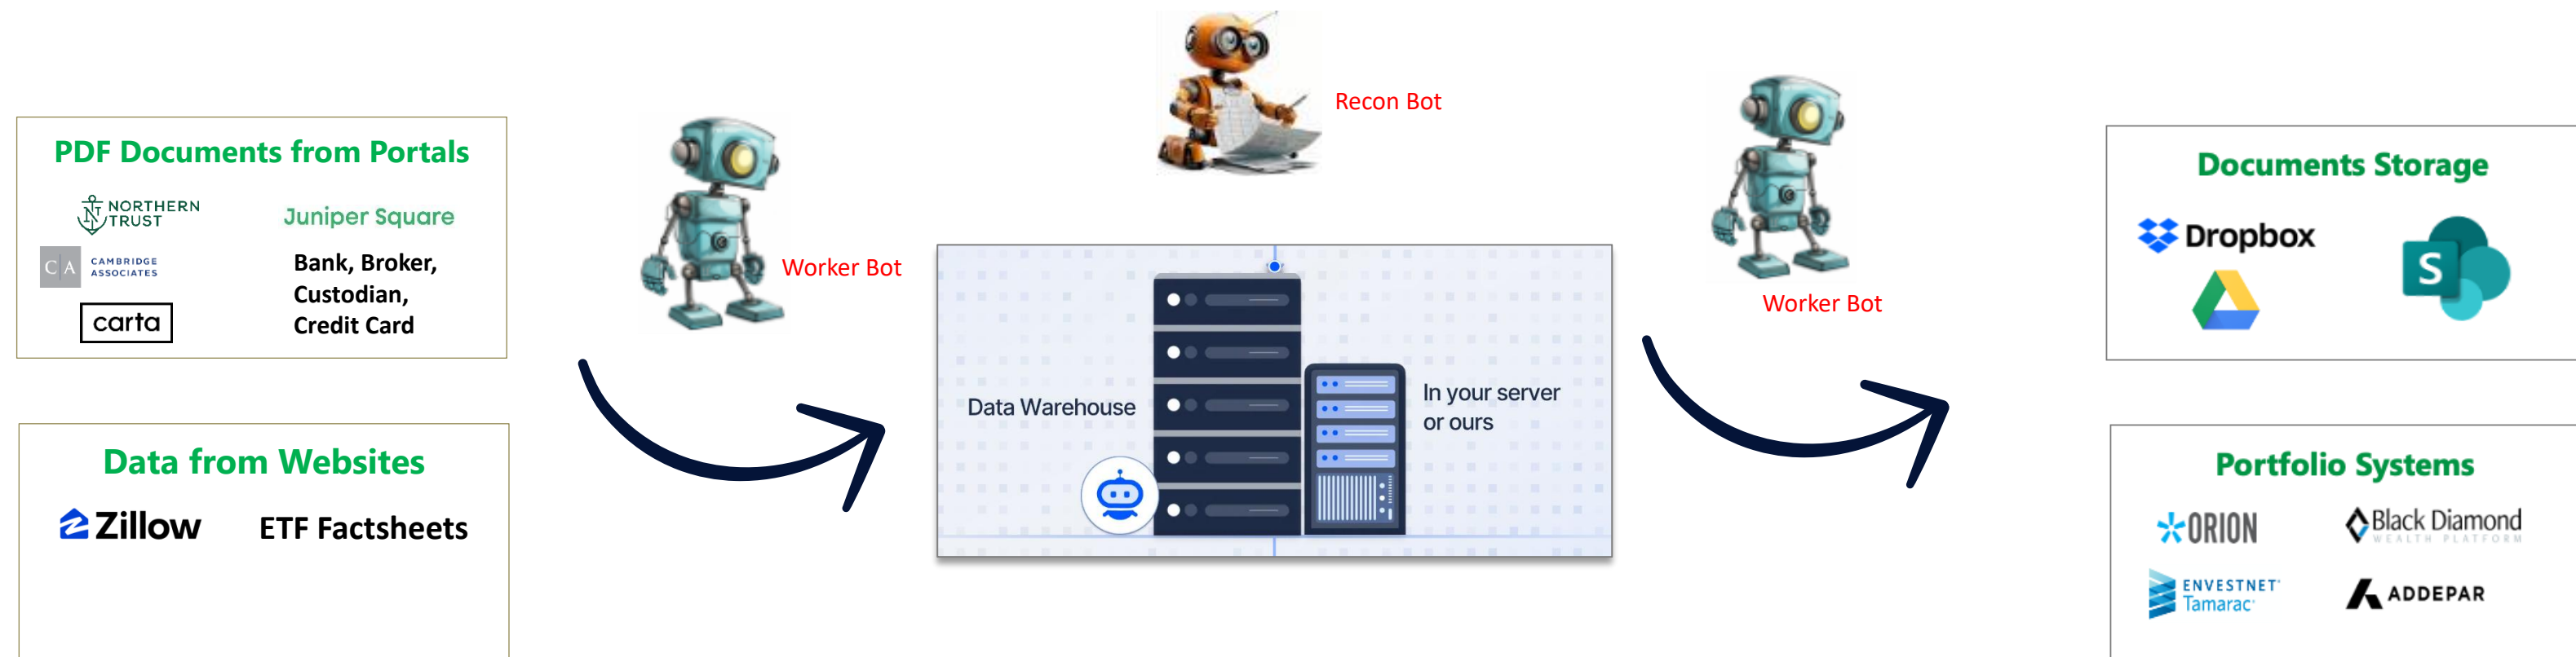

Randomized Data for Illustration Purposes only

Profit Made by Strategy

Case Study 2

The Problem: Staff is spending lots of time downloading documents manually from various portals.

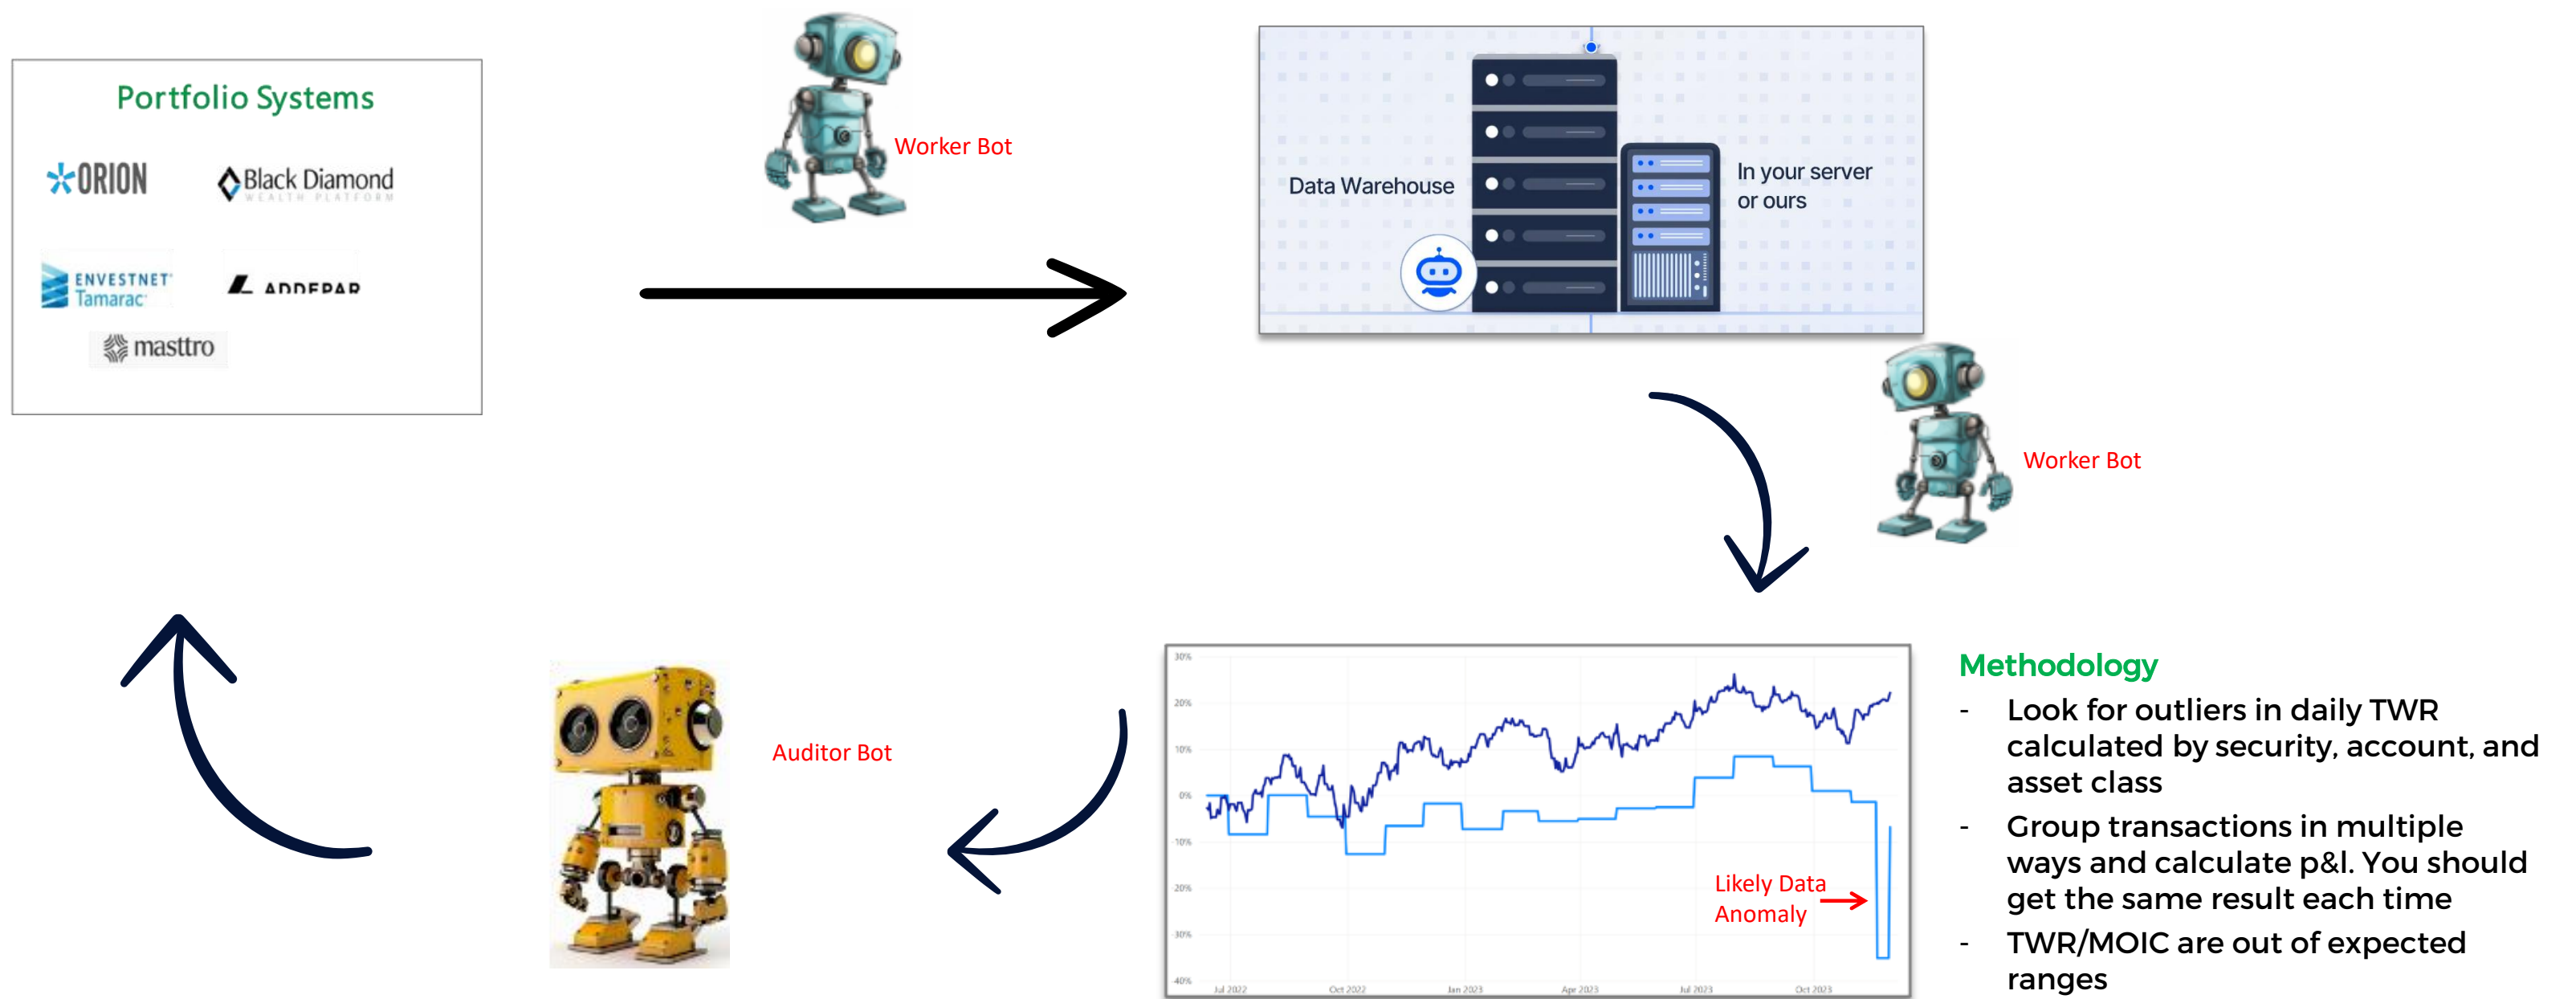

The Solution: Collation.ai downloads the files and extracts the data from the PDFs.

Case Study 3

The Problem: My data contains errors, which leads to incorrect reporting.

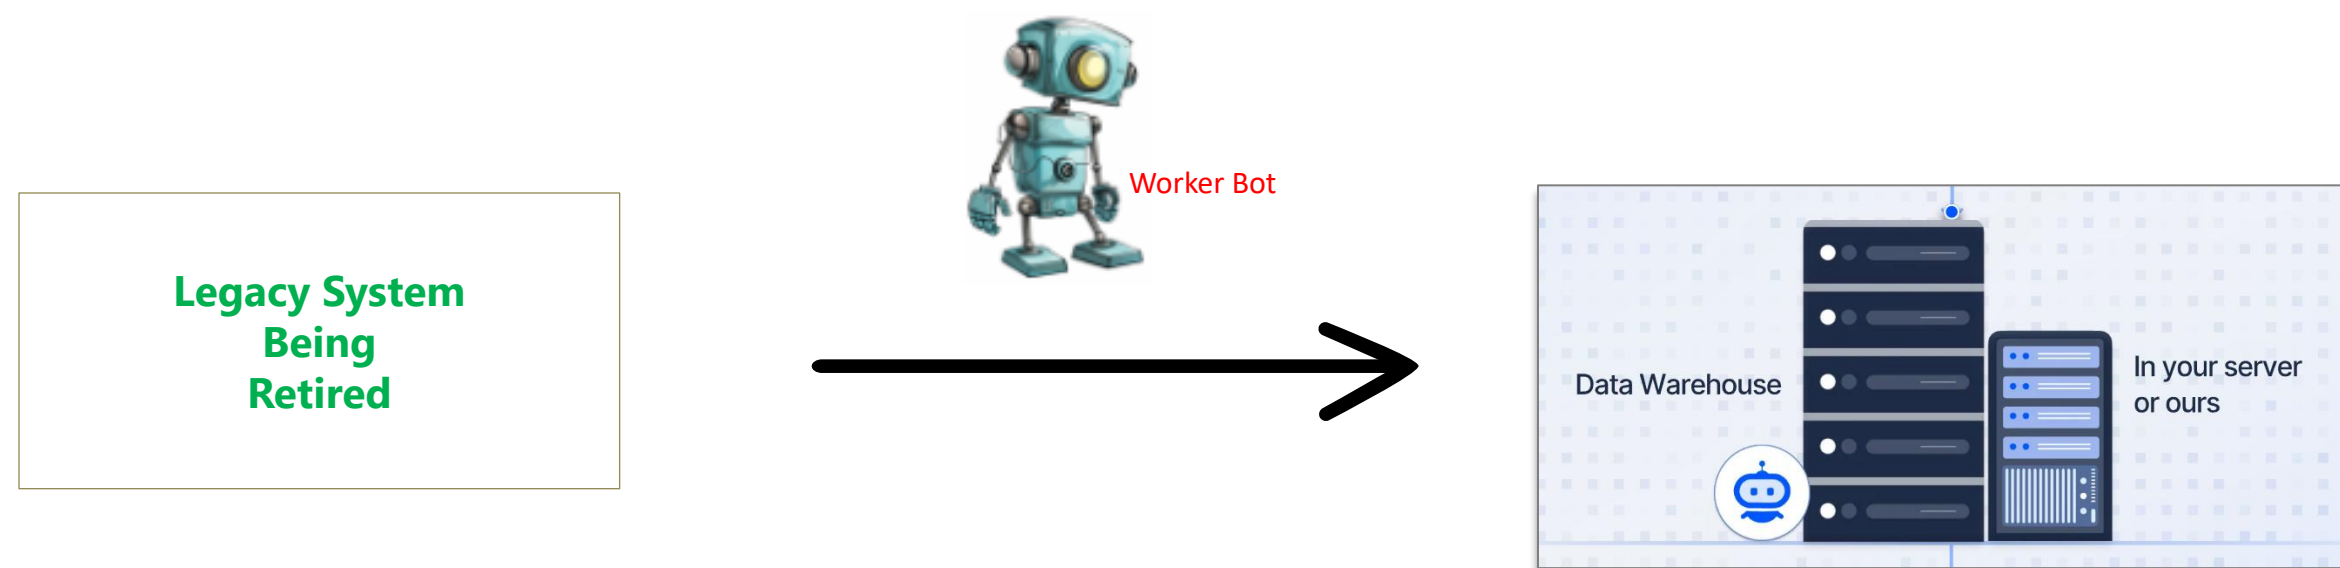

The Solution: Collation.ai's auditor bots scrub the data.

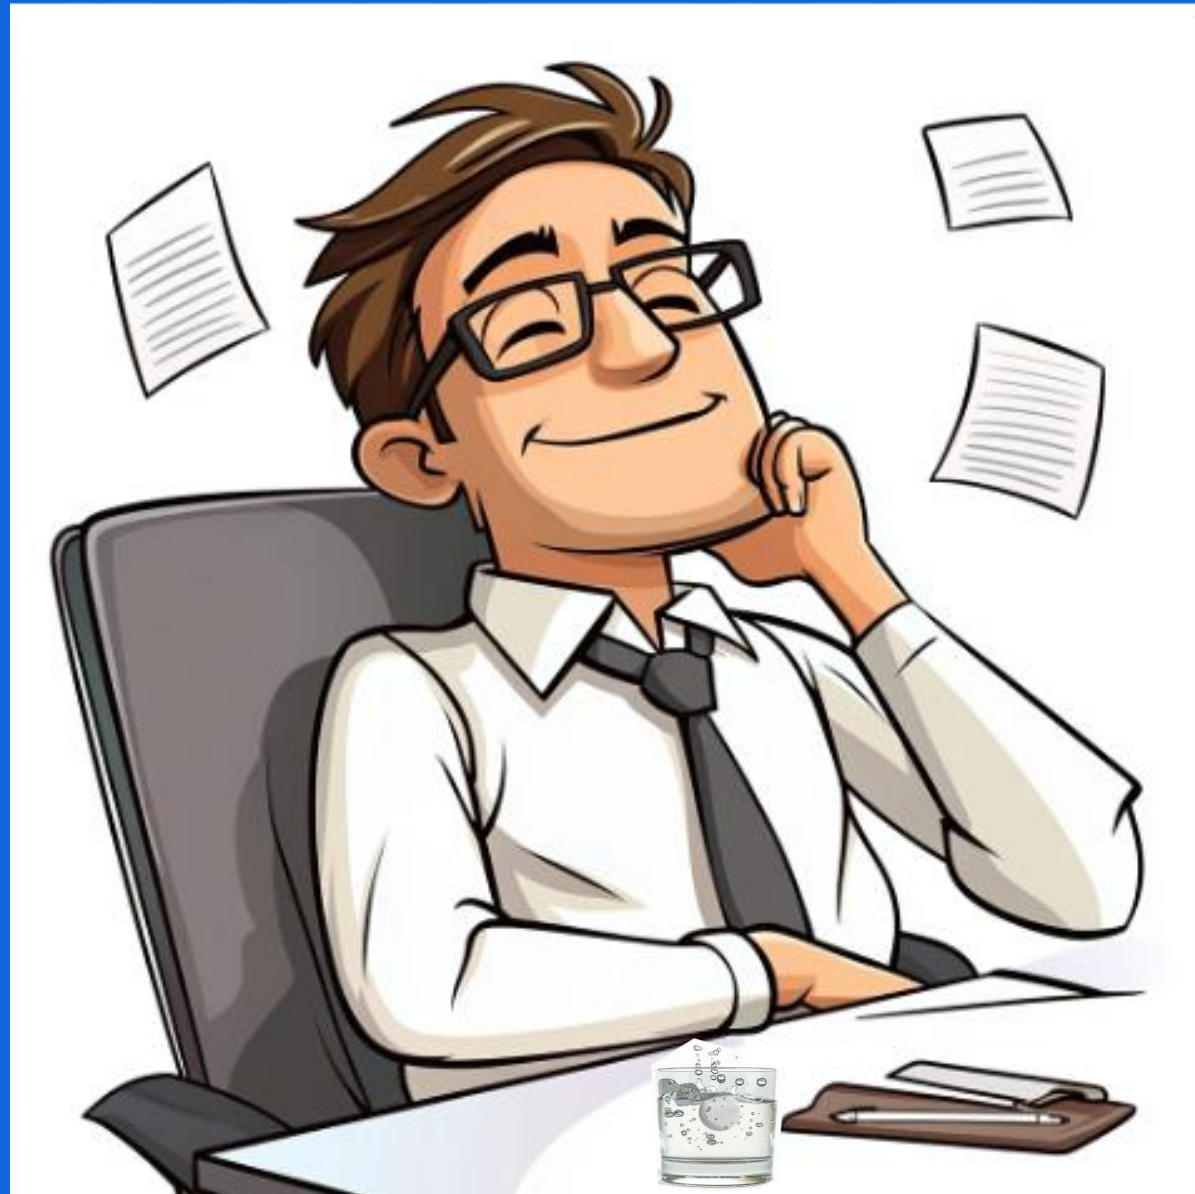

Case Study 4

The Problem: I will lose data on an old system I am planning to retire

The Solution: Collation.ai's bots will extract and warehouse the data

How it helps

Collation.ai overlays on top of your existing setup- no changes required!

Our Bots manage your data & workflows so you don't have to!

Bots get data from all your sources and normalize it

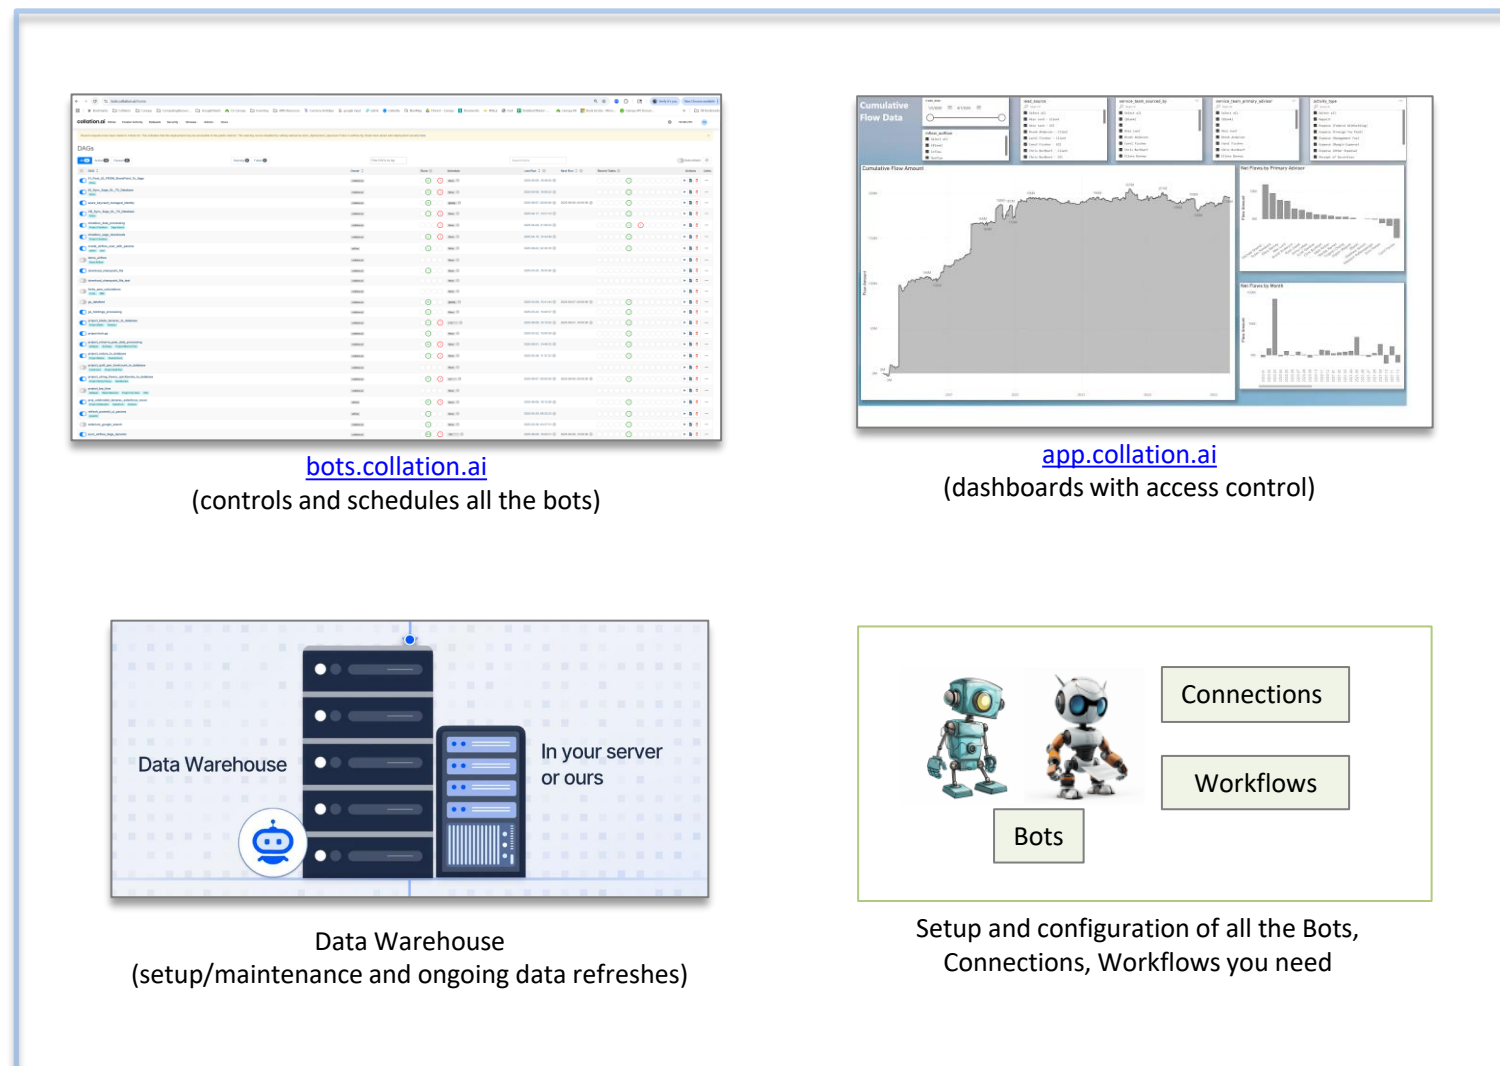

Ownership: All your data in your own data warehouse

Powerful user interface to design/customize reports

Implementation

Pricing*

\$30K setup (one-off)

Then

\$30K per year

Factors effecting Pricing

- Number and type of data sources
- Does the data need to be scrubbed?
- Number of PDF templates to be processed
- Number of Reports that need to be built
- Whether Collation or Client is hosting the Data Warehouse etc.

*Average Pricing for Clients.
