INTRODUCTION

WHO IS COLLATION.AI?

Collation.AI is a spin-off from Canopy, created from a Management buyout of Canopy's US business

Canopy currently reports on USD 170bn in assets across 300+ clients

Tanmai Sharma
(CEO)
Ex CEO at Canopy

Prashant Surana
(CTO)
Ex CTO at Canopy

Shamara Pereira
(Head of Implementation)
Ex Head of Implementation at Canopy

Sinan Biren
(Head of Sales)
Ex Head of Sales at Canopy

collation.ai

- Team from Canopy
 - including most of the C suite + key developers
- +
- Perpetual License to use all of Canopy's IP and training data on perfecting its AI use-case
 - 100k + training documents
 - Meta data on millions of transactions
- +
- Proprietary AI tech
 - Full ownership of any new IP created

USING COLLATION.AI

CASE #1 - ACCOUNT AGGREGATION

PROBLEMS

Complex assets,
siloed data

Multiple logins,
cumbersome access

Time-consuming
manual data entry

Lack of readily
customizable reports

HYPER PERSONALIZED ANALYSIS FROM ANY KIND OF DATA

Data Aggregation Methodologies

Step 1
Find if Datafeed/APIs
are available

Bank
Datafeed

Bank APIs

[List of Datafeeds](#)

Step 2
Failing which look for
other providers of
APIs

YODLEE
Quovo
tink

Step 3
Failing which use PDF
/ XLS statements
(typically monthly)

Excel

PDF

[List of PDF Statements](#)

Step 4
Failing which look for paper
statements (which is required by law
and always available)

Paper

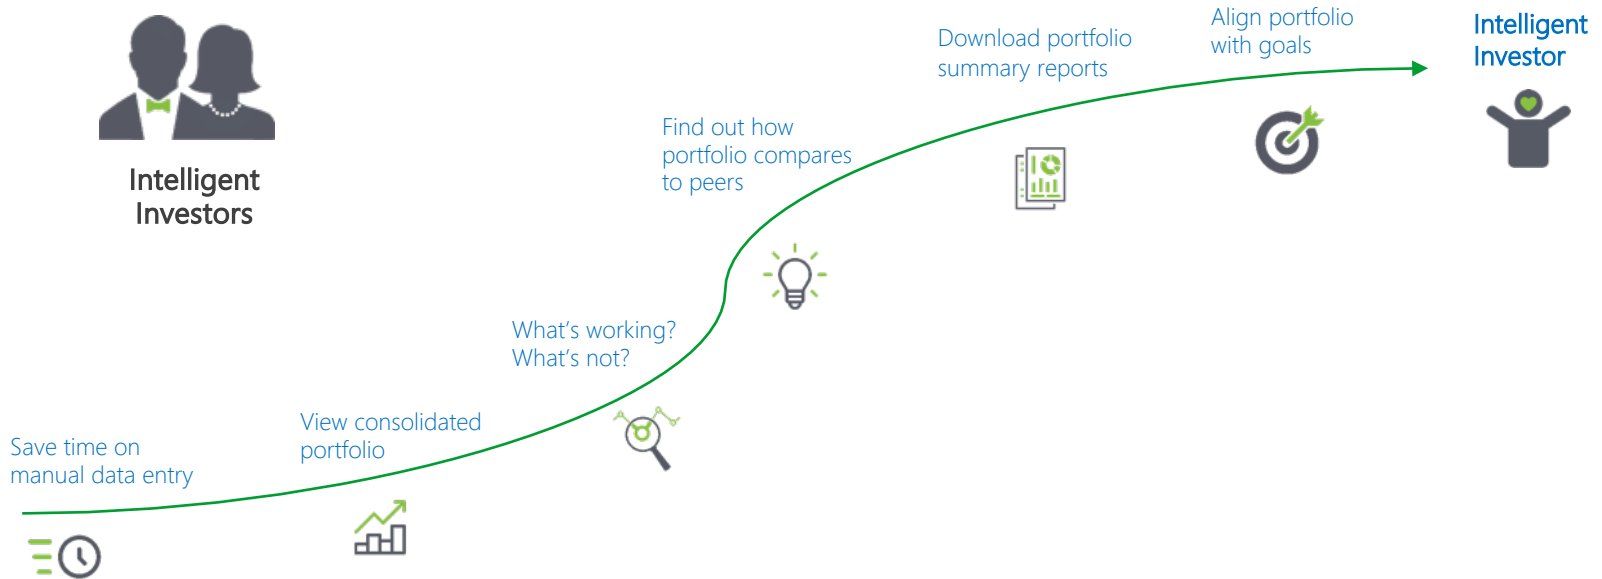

collation.ai

COLLATION.AI FOR INVESTORS

BECOME AN INTELLIGENT INVESTOR

Collation.AI enables investors to view their consolidated wealth portfolio in one interactive platform to make better informed investment decisions.

collation.ai

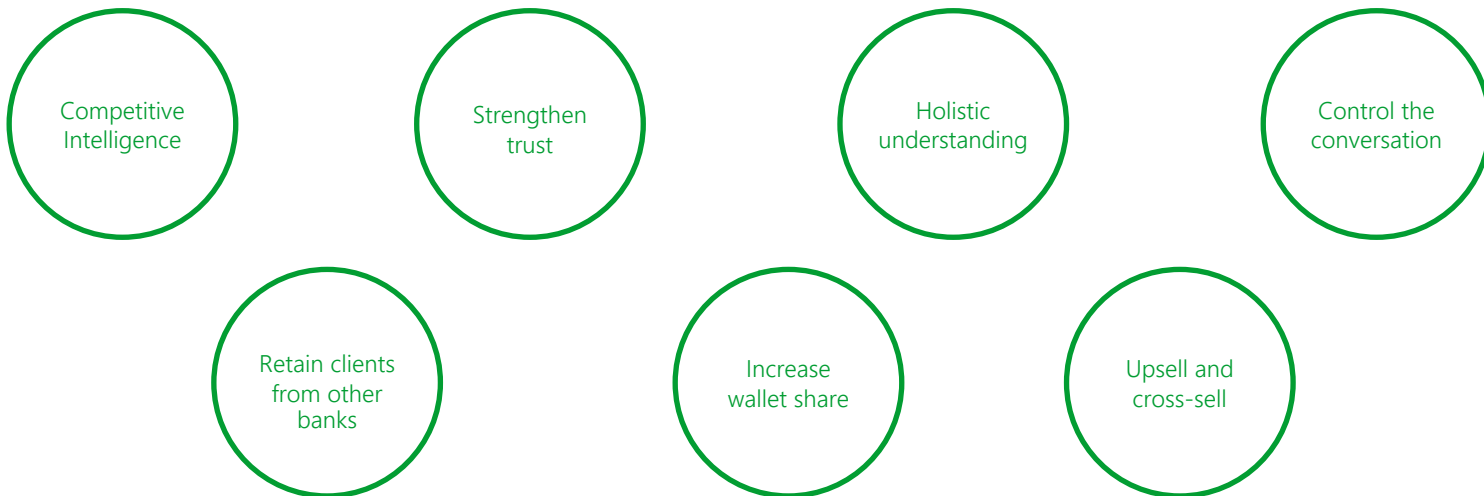

COLLATION.AI FOR ADVISORS

HOW DOES COLLATION.AI HELP ADVISORS?

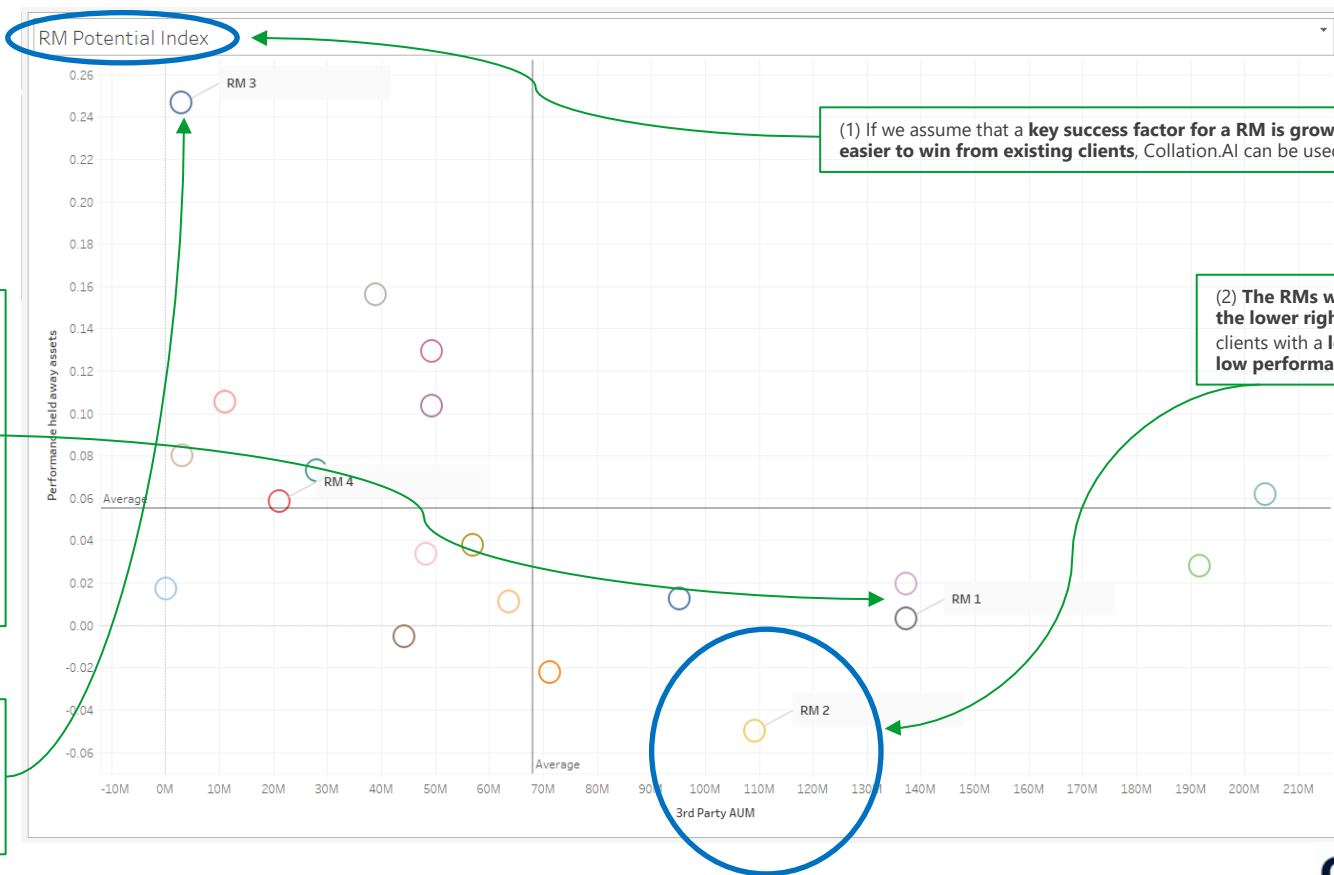

Assuming your client has accounts with 3 banks- making decisions with your own data would equate to making decisions with 66% uncertainty.

Most clients only aggregate their assets with one bank.

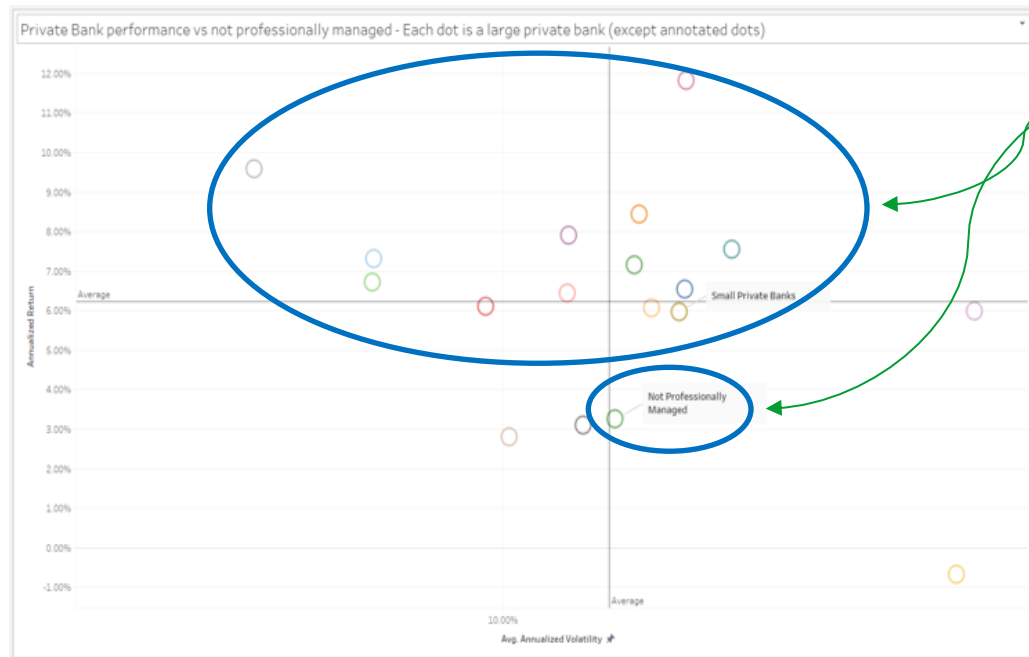

What if you could have a holistic view of your client's total assets?

"AGGREGATION"—IS IT THE ONLY SOLUTION IN MATURE MARKETS?

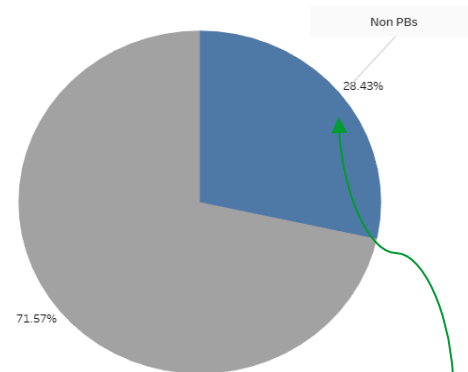

DOES THE INVESTOR ONLY HAVE ASSETS WITH PBs?

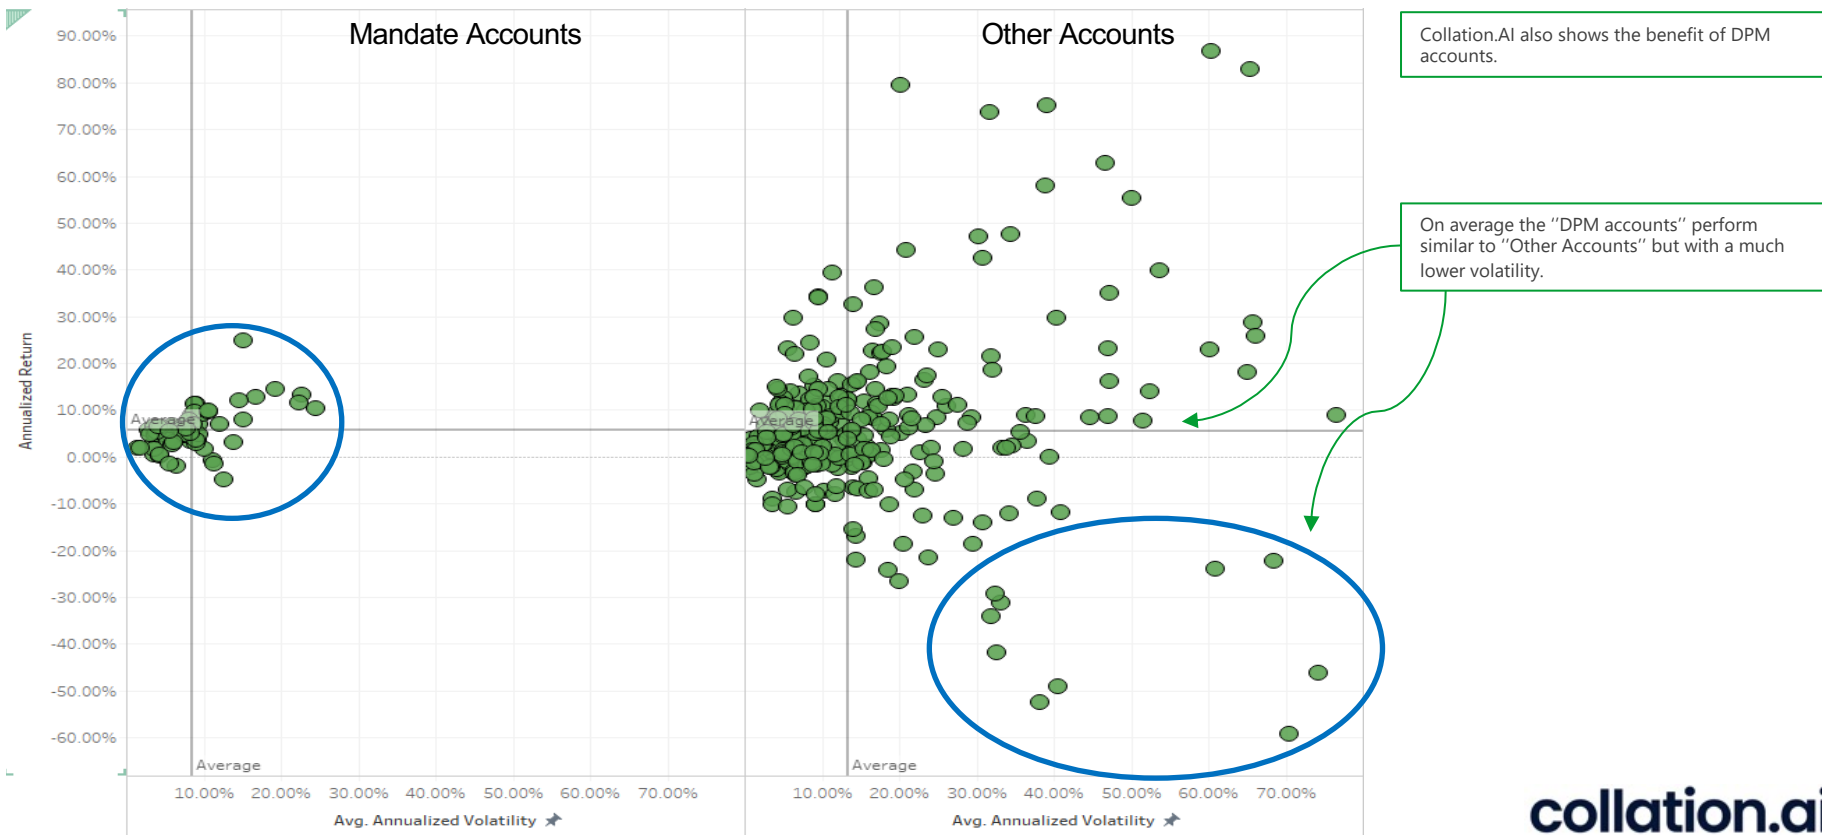

The "RM Potential Index" will show which RMs have these "go after" assets in their Investor portfolios so that Collation.AI can be positioned

(1) PBs outperform "not-professionally" managed assets

(2) "Not professionally" managed assets represent a significant portion of total assets. Considering the performance gap, this is a sweet spot for PBs to go after

HOW DOES AN ADVISOR POSITION “DISCRETIONARY PORTFOLIO MANAGEMENT”?

AGGREGATION IS NO LONGER SOMETHING "NICE TO HAVE" BUT RATHER A STRATEGIC CHOICE!

Problem 1

Lack of competitive insights

Solution 1

Ability to assess clients' behavior with other banks and offer more competitive services

Problem 2

Time intensive preparation

Solution 2

Consolidated accurate data and professional reports at your fingertips

Problem 3

Revenue pressure

Solution 3

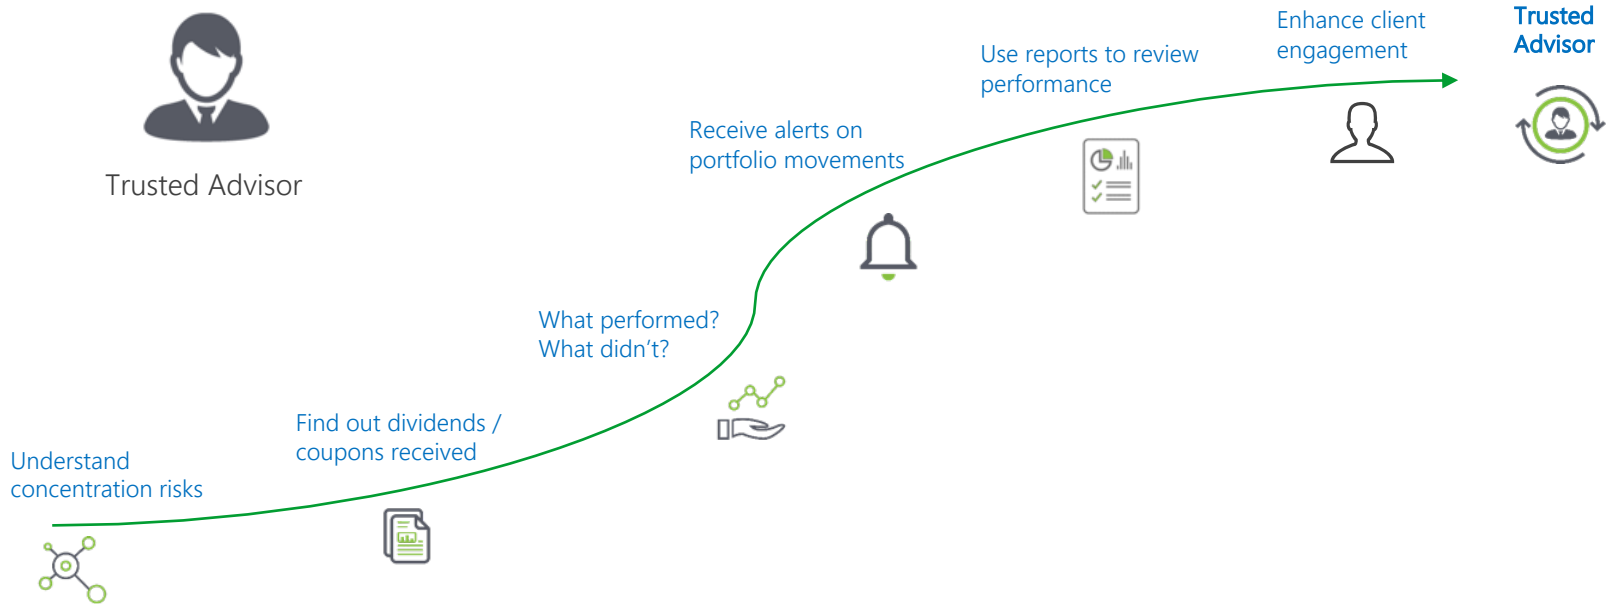

Analysis leads to better performance which strengthens trust and increases wallet share

collation.ai

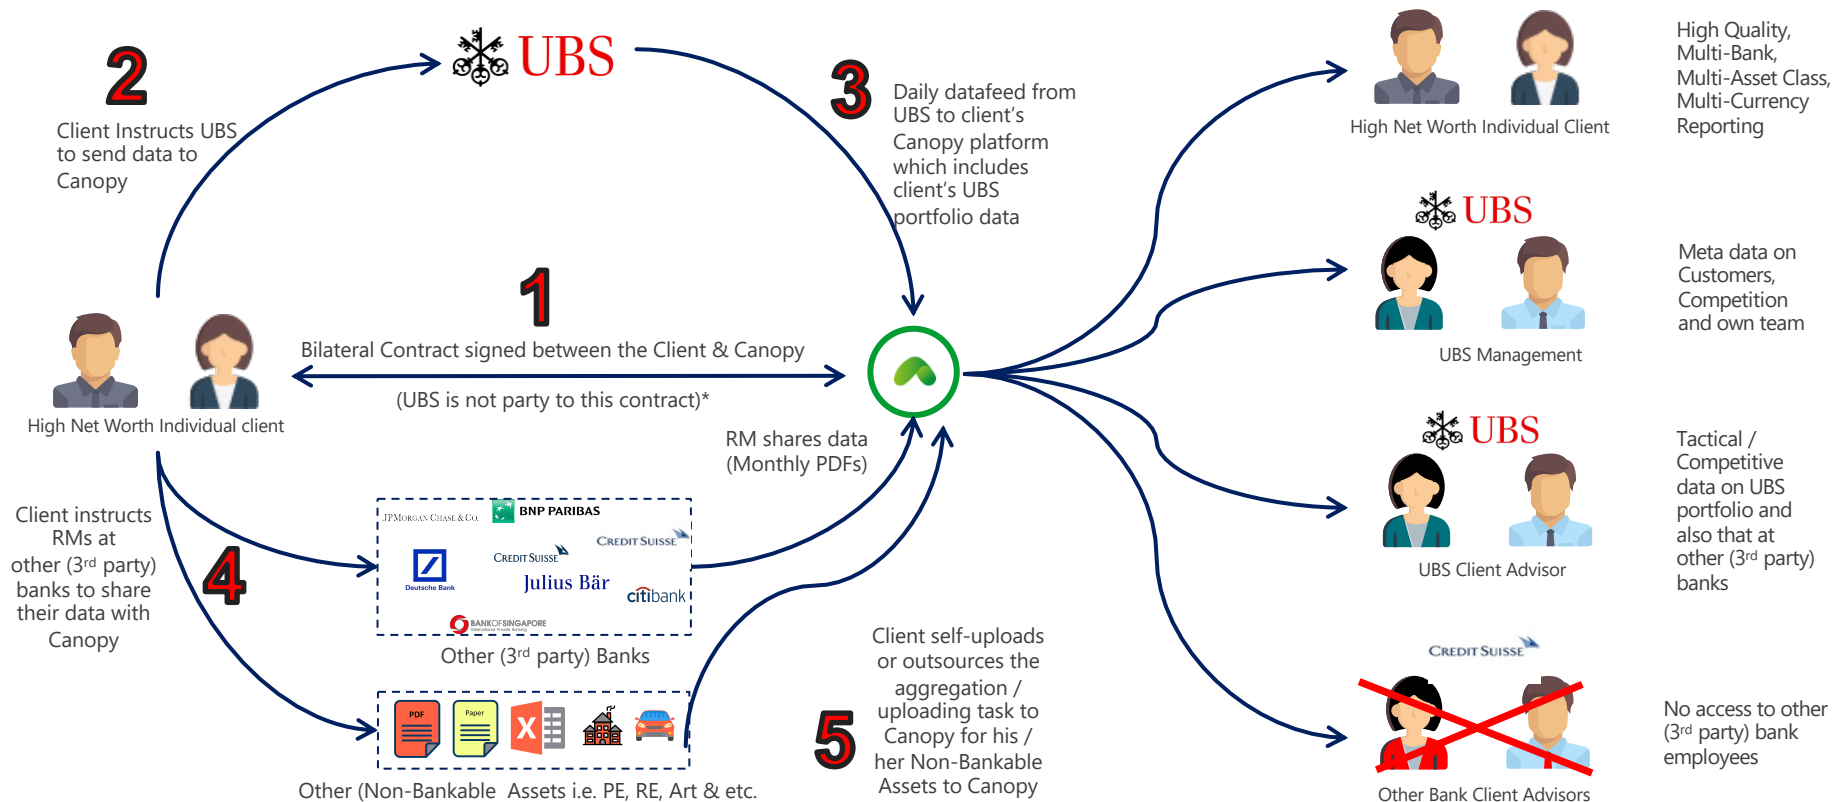

COLLATION.AI FOR CLIENT ADVISORS

Collation.AI allows Client Advisors to perform analytics on your clients' portfolios. Gain the status of trusted advisor and increase wallet share.

collation.ai

USE CASE AT CANOPY: UBS

*Canopy is effectively agent of the client and each bank / entity individually provides that client's data to Canopy on direct instructions from the client. Canopy aggregates the data and does analytics for the client. In case client authorizes this aggregated data / analytics is also shared with UBS (i.e. client's CA at UBS).

CASE #2 – BIG DATA MINING & STIMULATING CLIENT ACTION

CUSTOMER LOGINS

Task-oriented logins

Most visits to financial websites are task oriented. Customers visit with a specific purpose in mind (e.g. pay a bill, download a statement etc)

Markets are time sensitive

Each insight has a short shelf life. Providing outdated insights on websites can affect reliability

Low login rates combined with task oriented logins mean that the probability of a customer logging in and seeing a relevant insight is close to zero

*20 / 80 problem
80% of revenue comes from the top 20% active clients.

What about the remaining 80%?

Client Advisor*

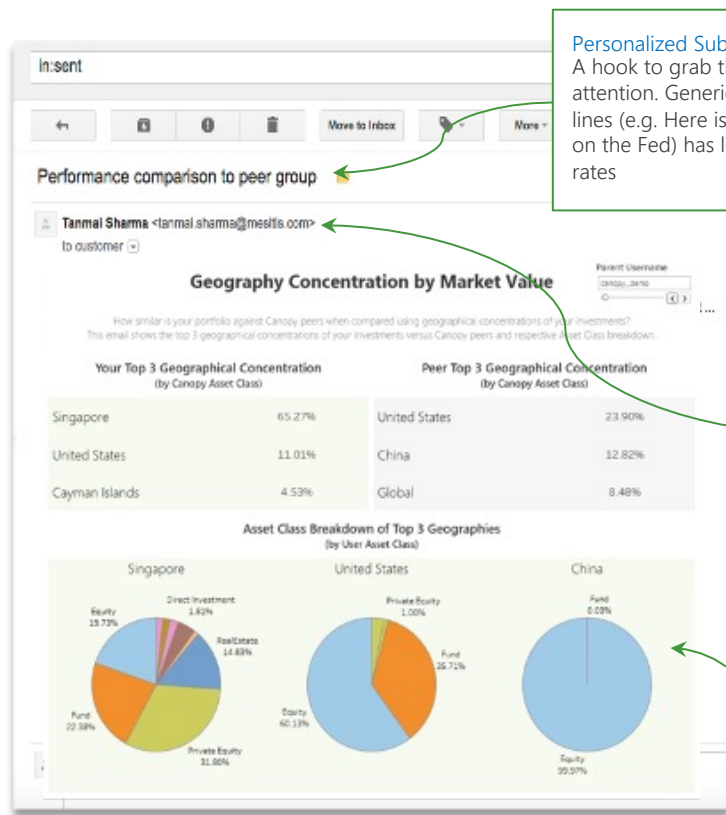

Website

Customized Emails

Collation.AI has experimented with many channels and found that regular personalized emails + a website + the usual RM interaction deliver the best results

PERSONALIZED AND TARGETED EMAILS

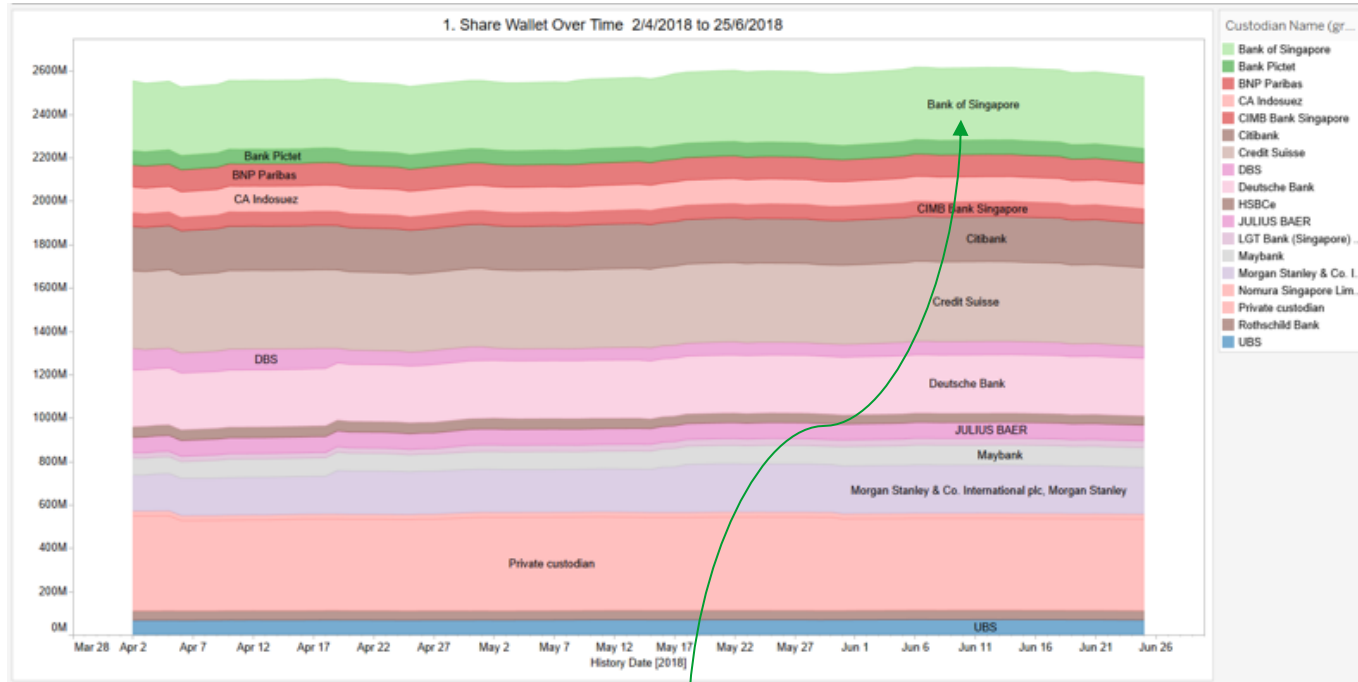

Collation.AI's experience with emails:

- Close to 100% open rates:**
By tracking open rates, Collation.AI knows how to use emails to not only get the message across but also to result in action.
- Multiple email opens:**
Emails are often forwarded to other recipients; and so the email channel forms an ecosystem between the client and their network
- Clients taking action:**
When faced with new insights, we often see clients reaching out to gain further details - an ideal scenario!
- Clients requesting more:**
The best indication of success is when clients request for more emails with similar content.

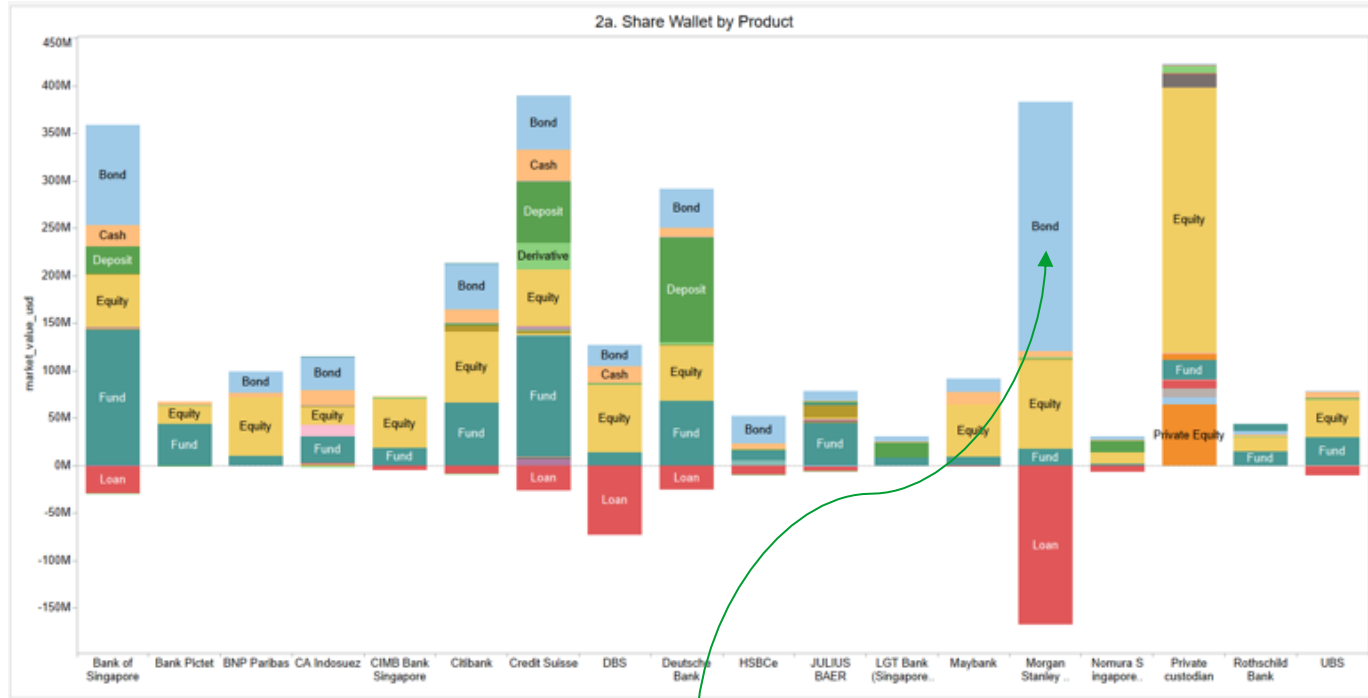

DASHBOARDS FOR COMPETITIVE INTELLIGENCE

AUM WALLET SHARE OVER TIME

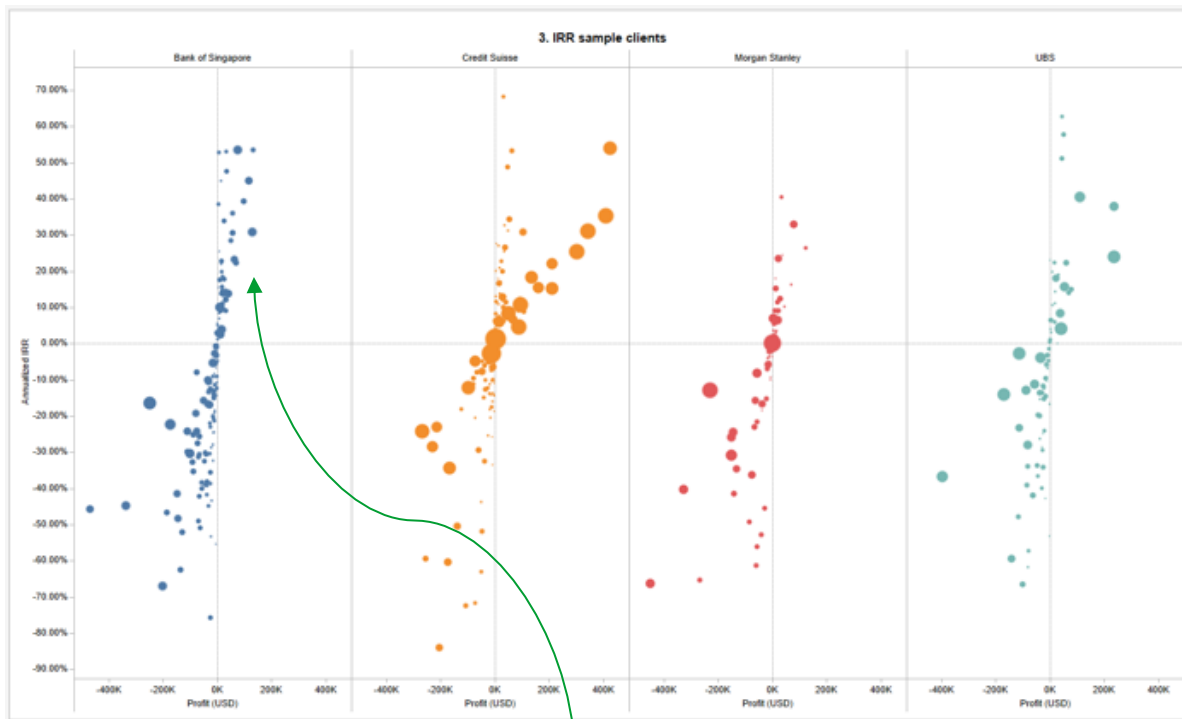

View your competitors and their respective changes in AUM over time

ASSET ALLOCATION BY CUSTODIAN

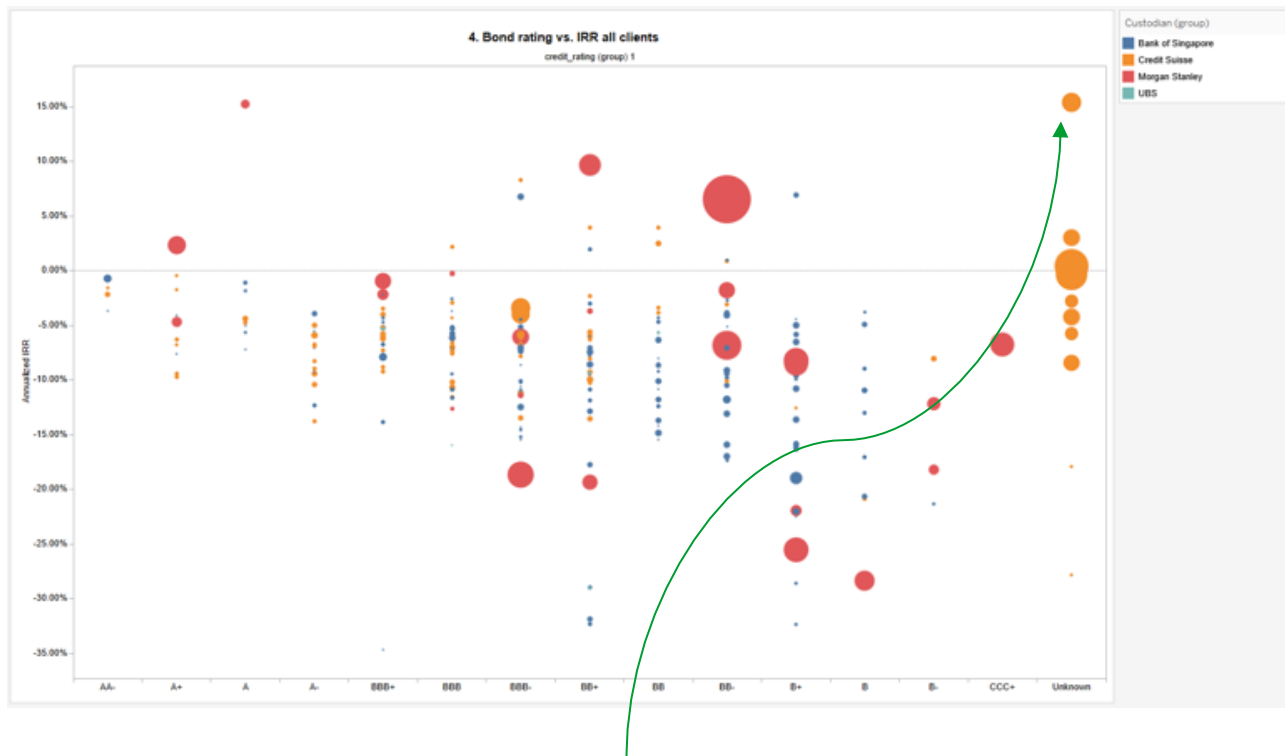

Where do your clients have the highest leverage?

IRR BY CUSTODIAN (EQUITIES)

Compare your client's returns at other banks

IRR FOR BY CREDIT RATING (BONDS)

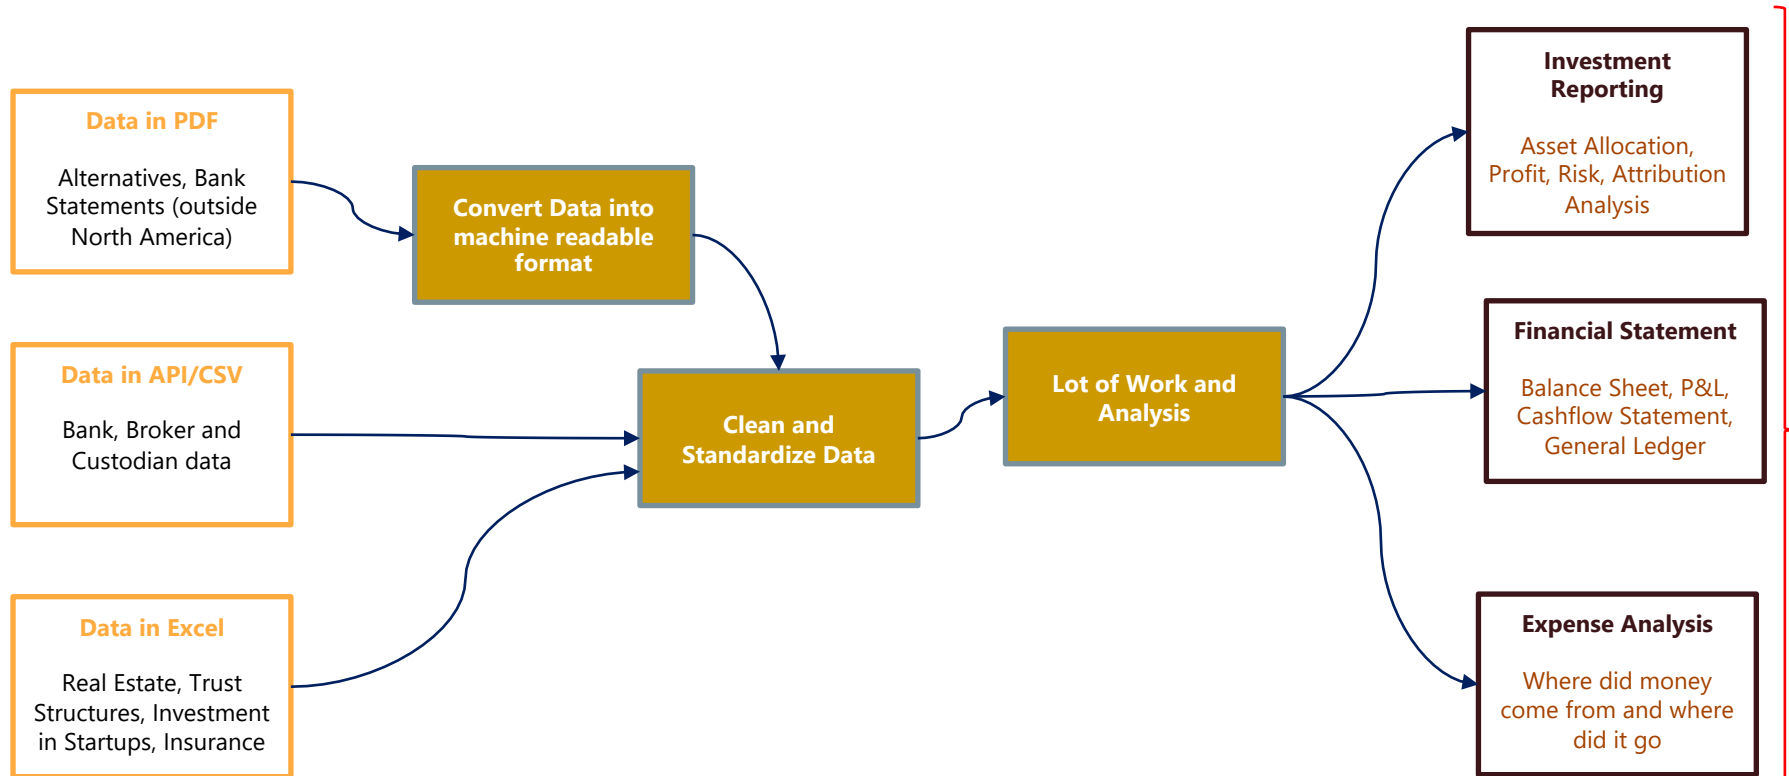

Compare your client's bond investments at other banks

THE PLATFORM

Typical data flow for a HNWI / UHNWI client
