ABOUT US

Collation.AI is a WealthTech platform that reduces costs, streamlines workflows, and boosts client retention by consolidating financial data from your existing technology stack into a centralized Data Warehouse.

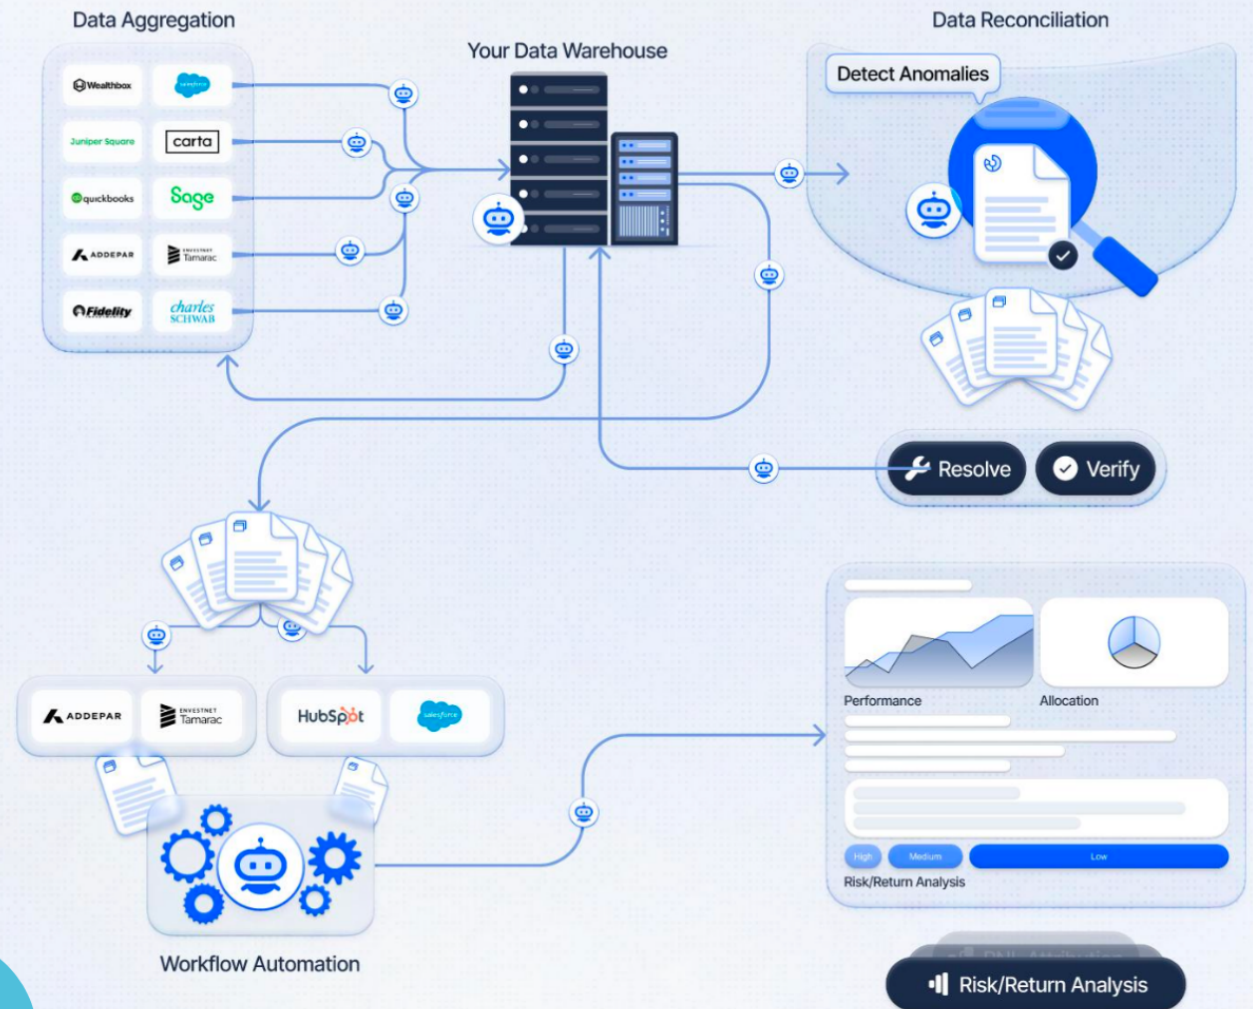

Our bot-driven workflows automatically reconcile, enrich, and maintain data integrity.

This foundation enables flexible, scalable reporting and powerful analytics to drive smarter decisions.

CASE STUDIES

collation.ai

CASE 1

Problem

We are a FO and our Accounting System does not do investment reporting.

Solution

Collation.AI generates reports as an overlay to our current General Ledger system after having enriched it with the data coming from our Custodian Banks (e.g. Schwab, Fidelity)

Collation.AI was 30% of the cost and 4X faster than the next best solution.

CASE 2

Problem

Our staff is spending way too much time on downloading documents manually from various portals.

Solution

Collation.AI downloads the files and extracts data points from all your data providers.

We saved 1 full head count and Collation.AI was 4X faster than any other vendor.

CASE 3

Problem

We will lose our data that is on our old system we are planning to retire.

Solution

Collation.AI's Bots will extract and warehouse the data.

Collation.AI was 60% more affordable and 10X faster than anything else in the market.

CASE 4

Problem

My data contains errors, which leads to incorrect reporting.

Solution

Collation.AI's Auditor Bots scrub the data.

Our Customer base grew 3X with 80% retention rate.
